Notes:

1. Cost reductions are calculated as the difference between the proposed costs in the FY13 budget and costs if enrollment counts were not adjusted for average daily attendance. They do not reflect direct reductions in state aid. The degree to which these costs are funded and whether the funding comes from state aid or local taxes varies by district.

2. General Education costs are those portions of the adequacy budget that cover the base costs and the additional costs for at risk and Limited English Proficient (LEP) students.

3. Special Education costs are the both the Special Education costs (funded 2/3 through Equalization aid and 1/3 through Categorical aid) and the Speech Only costs.

4. Per pupil calculations use the resident enrollment from October, 2011. Averages are district averages weighted by resident enrollment.
